

Facilities approved to export unrooted cuttings of *Petunia* spp and *Calibrachoa* spp to the European Union and their traceability codes

Unrooted cuttings of *Petunia* spp. and *Calibrachoa* spp. are young plant cuttings used for propagation in commercial ornamental flower production. KEPHIS has approved the following facilities for the export of these planting materials to the European Union, together with their respective traceability codes.

The approved facilities meet the applicable phytosanitary requirements, supporting Kenya's access to international markets while ensuring plant health, product traceability, and compliance with European Union import standards.

No.	Facility	Location	Traceability code
1	Selecta Kenya GmbH & Co.KG	Juja	KE/022/113/EU01
